

ENR 5.6

ENR 5.7 BIRD MIGRATION AND AREAS WITH SENSITIVE FAUNA

1 **Bird migration**

A large number of bird migration occurs throughout the whole year.

1.1 ***Information on densities***

The Flight Information Service will issue information if the bird density is 5 or more. Such Information will be available at the ATS briefing Office at Male' International Airport, comprising the following information:

- a) bird risk warning
- b) issuing station
- c) DTG
- d) heightband (AGL)
- e) validity

1.2 ***Reporting of birdstrike***

To achieve more comprehensive statistics of bird strikes, the Civil Aviation Department is collecting information. All pilots on flights within the Male' FIR are therefore requested to report to the Civil Aviation Department all cases of bird strikes or incidents where a risk of bird strike has been present.

Reporting

To facilitate the reporting of incidents, a Bird Strike Reporting form has been produced and may be obtained at airport briefing office or from Civil Aviation Department .

Any supplementary information on the circumstances under which the incident took place should also be added.

2 **Areas with sensitive fauna**

Nil
